

**PELA ACADEMIA  
FOR THE ACADEMY**

## **Introductory Note**

"For the Academy", motto of a project which, effectively, identifies itself with the Academy of Aveiro and which is committed with constant and responsible work towards the whole student community, intending to elevate and to value more and more not only the history of our AAUA, but essentially, of all the students of Aveiro.

It is a project formed, essentially, by a renewed but, above all, experienced team which had in its genesis the recognition of the associative structure present in our Academy and more than that, the AAUA's associative structure. Renewal is a key piece in any project of this kind since, with constant changes in society and the need to adapt to it, it is important to have new voices, new faces and new working methods which allow AAUA to constantly mutate and mould itself to the society and community in which it is inserted.

As for the team, it is important to highlight its composition and critical thinking in its construction. The University of Aveiro has in its composition two teaching subsystems which over the years have shown an immense articulation and the potential of having an Academy in which the exchange of experiences is a cornerstone. In this context and looking at the 16 departments of the university subsystem and the 4 polytechnic schools, it was fundamental for us to form a team that could be represented with at least one element of each department and school. This way, the exchange of experiences is truly rich, listening to the whole community will happen constantly and the valorisation of the whole Academy is enhanced.

Our values will always cherish transparency, political and social independence; inclusion of all our colleagues regardless of gender, race or physical/social condition; prioritisation of physical and psychological well-being; formation of the self also through culture; demand for more and better conditions of Higher Education; honour the history of our AAUA; proximity to the whole region and among the whole academic community, as well as the valorisation of the whole AAUA structure, namely its nuclei and sections.

Finally, we affirm that we will always work to respond to all community challenges, which are naturally inherent to the responsibility of running a AAUA in growth. And above all, that in 2023, among all and with all, we will effectively manage to work for the academy and for all our colleagues!

## **For the Academy!**

On 28 June 1978 the Students' Association of the University of Aveiro was founded and later became the Academic Association of the University of Aveiro (AAUAv), a name we recognise today and in which more than 17 000 students at the University of Aveiro are represented. Throughout its existence, the institution has always sought to meet the growing needs of students, regarding the most diverse areas of Higher Education.

With its main focus being defending the interests of the whole Academy, over the years AAUAv has also been increasingly prioritising the complement to pedagogical education; sports development and the promotion of dual careers; cultural training and through this, the training of the self as well as the involvement with the region and work in favour of an ever more marked social aspect.

In this sense, the presidency of AAUAv should always cherish the well-being of the project, as well as of the whole team. Always strengthening and empowering the team that embraces the project, in order to create leaders and examples in the associative movement. In this way, and to work on the various vectors of AAUAv's action, and leading the project, some of the AAUAv's fundamental projects and objectives for 2023 are:

- Creation of services to strengthen the Academy and simultaneously create profitability for AAUAv, making it increasingly subsidy-independent;
- Launching University Radio, creating a local communication channel and bringing the academic community closer to the region;
- Commemoration of AAUAv's 45th anniversary, extolling its history and launching futuristic projects;
- Creating a study centre regarding the associative movement, based on strengthening AAUAv's political positions, as well as writing a book where the various positions are linked;
- Strengthening Bar do Estudante's daytime service, replicating the fortified model for the opening of the CUA, this being explored by AAUAv;
- Creating the UAVEIRO sports club, as well as an Academy that accompanies its growth;
- Bringing AAUAv increasingly closer to other Student Associations, building bridges and joint projects;
- Holding the European University Basketball Championships in July 2023, showing our institution's ability to project itself in European sport;

- Carrying out the application to hold the final stages of the CNU's for 2024, with the goal of strengthening the UAVEIRO sports project;
- Construction of padel courts, creating a new service to the community and boosting crasto;
- Work on strategies to Include all students in the academy and ensure their well-being, regardless of their gender, race, sexual orientation, social values they believe in, among others;
- Hold Enterro'23 and Integra-te'23, increasingly projecting their brands, making them a reference;
- Encouraging discussion in the Academy around important themes in Higher Education, such as the value and conditions of housing or social action;
- Affirm the work developed in the reformulation of the cultural strategy of the institution, mainly in the way it is provided to the students and the Region;
- Instigate the associative spirit of the UA, increasing the spaces for discussion and education moments to the AAUA Structure;
- Encourage the development of sustainable and innovative practices that impact the student's daily life;

## **For an Academy that increasingly belongs to all**

An Academic Association is by nature a political institution. It is a Free, Independent, Unionist and Non-Partisan institution. Without this intrinsic nature, academic and students' associations have no reason to exist. The Academic Association of the University of Aveiro is the representative institution of all students of the University of Aveiro, i.e., the AAUA is the political institution that truly works in defence of students' interests.

It is with this sense of responsibility and of wanting to do more for the academy that the Educational Policy sector is committed to being an active and responsible political agent.

In this way, the Educational Policy sector commits to:

- Discuss the funding of Higher Education Institutions and the Tuition Fee, always looking out for the students' well-being and interest;
- Debate the restructuring of Higher Education, valuing the student in this discussion;
- Claim for a reinforcement of Direct and Indirect Social Action, in order to fill in the gaps that currently exist in the subsidization system at Social Action level;
- Fight against the lack of university accommodation, trying to get the Social Services to promote solutions for the gaps that currently occurring at the level of university accommodation at the University of Aveiro;
- Work hard so that the revision of the Legal Regulation of Higher Education Institutions is effective, committing ourselves to defend a vision in which the student becomes a more active agent in the existing management bodies in *IES*;
- Maintain Institutional representation and Participation in the Student Associative Movement;
- Creating a Study Centre in order to give dignity and greater credibility to the various AAUA documents, thus enabling a theoretical basis to substantiate all motions and other measures that are intended to be presented both at the level of the *IES* in question and at a national level;
- Support and Follow-up the Integration of International Students in the University and in the city and also in the pedagogical aspect, extending the Buddy programme to all International students with a personalized follow-up by the course nuclei that represent them;
- Support in the learning of the Portuguese Language for International Students, through the project Study Support, in collaboration with the sector Aveiro é Nosso;

- Celebration of important events for the International communities, promoting the continuation of the International Weeks, and elevating them, making them essentially more complete and vast in terms of the subjects treated;
- Continuation of the Entrepreneurship Bootcamp;
- Celebration of the day of youth associativism together with all the existing associations at the University of Aveiro;
- Writing and launching a book on AAUAv's vision for higher education, as a way of celebrating AAUAv's 45th anniversary;
- Creating fortnightly articles in local and/or national newspapers in order to demonstrate AAUAv's position on the various current affairs;
- Projecting the AAUAv in the country, through participation in national events and publications in the media;
- Clarify what AAUAv's concrete position/request is on each issue, making it clear to students;
- Make Mental Health a priority topic within the Academy and in the national Teaching panorama, making discussions and claiming with the competent organs, a combat strategy at a national level;
- Include the Branches more in the participation/discussion of the Educational Policy;
- Communicate in a more direct and close way, the advances/requests of the Educational Policy;
- Clarify the concept of University 5.0 and through various activities (debate, workshop, etc.), spread it throughout the whole year, with the Employment Fair being its climax;
- Restructure AAUAv's Entrepreneurship strategy and cooperate with other promoting entities in order to join forces and channel information to students more effectively;
- Continuation of the celebration of relevant Commemorative days;
- Continuation of constant collaboration with the various student structures representing international students of UA;
- Promote the active participation of students in the Residents Forum;
- Develop studies that focus on daily problems of the Academic community, through the Study Centre, producing content able to be discussed with the competent entities, namely near the *IESs* management bodies;

- Continuation of the work in the "Inclui-te" initiative, in cooperation with the University of Aveiro, the Academic Association of the University of Minho and the University of Minho.

## **For a Closer Academy**

The structure of the Students' Union of the University of Aveiro stands out from the others because of the proximity between the Nuclei, Sections and the Governing Bodies of AAUAv. This close relationship allows the voices of the students represented by the Nuclei to be heard and their concerns and needs to be constantly answered. Therefore, and with an eye on the proximity that characterizes the whole structure, the Nuclei Support sector of the "For the Academy" movement wants to facilitate the whole process of student consultation and representation. Therefore, the focus of the Nuclei Support is a generalized and complete training of the students' leaders, who are the main speakers of the students, mainly in what concerns periods of auscultation, claim and constant communication with AAUAv, trying to promote, continuously, a link between the several nuclei that compose the structure, so that together we can continue to build an academy of future.

With these purposes, the sector is determined to:

- Hold three training moments, keeping the Forma-te@AAUAv and the Forum@AAUAv, adding a training moment in the middle of the mandate of the Nuclei;
- Provide, in addition to the three moments described above, trainings to the different sectors present in the Nuclei, emphasizing team management, financial management, external negotiation and AAUAv platforms;
- Review and adjust the Nuclei Regulations, collecting their opinions so that they can be closer to the structure;
- Dynamise and improve the CN-AAUAv, always aiming to promote a transparent and fruitful communication between the structure;
- Assist the Nuclei in the elaboration of the Plan of Activities and Budgets and the Annual Report of Accounts, always encouraging collaboration between the various Nuclei;
- Debureaucratization of the Nuclei processes;
- Re-evaluate the financial processes of the Nuclei, promoting their continuous improvement;
- Accompany the Nuclei in the running of events and encourage the creation of joint events in different fields;
- Proceed with the initiative of awarding prizes to the AAUAv Cores according to the work done during the term;

- Strengthen the associativism project, trying to integrate students in the process involving the management and planning of a Nucleus;
- To visit the branch offices in order to understand their needs and to make a survey of the different materials they have available for later creation of an inventory and sharing among the branches;
- Encourage the reactivation and continuity of inactive Nuclei;
- Create a platform that promotes an easier access to the necessary information, a boosting of the activities between Nuclei and an optimized communication between the structure;
- Facilitate the process of carrying out the RAC by making a continuous top-up;
- Encourage periodic meetings with each Branch to survey the needs and assist in the planning of activities;
- Encourage individual training for each nucleus, in order to develop a better environment and address more specific issues to each one;
- Create moments of sharing between the Nuclei-AAUAv so that an increase in the network of contacts can be promoted;
- Implement strategies to dynamize communication between Nuclei of the same department;
- To guarantee the sustainability of the structure;
- Enhance the history of the Structure by making it known to the different Cores and encourage the sharing of the history of each one;
- To promote active discussion on the part of the Cores concerning the strategy of the institution;
- To work on the Nuclei involvement in the teaching practices of the AU by encouraging closer communication with the course committees;
- To envisage and support the formation of Departmental Nuclei;
- Continue the realization of the Nuclei agenda.

## **For an Academy that prioritises Sports and Well-Being**

Sports in our Academy have been growing consistently, also because AAUAv has been showing a lot of effort in order to potentialize our Academy and the richness of a dual career. Alongside, and allied to sports, it is important to highlight both physical and psychological well-being, which over the years has been a concern of the institution, and which we intend to maintain and work towards an increasingly stronger Academy.

In this sense, the Sports and Well-Being sector of the movement "Pela Academia", for the 2023 mandate, intends to raise its activity and the sports offer of the AAUAv and at the UA, both at the level of professional and amateur sports.

Besides the investment in sports, this sector also intends to further develop the programmes and activities linked to mental health already in practice, as well as to create new forms of student support. Our major goal is to support our colleagues to increase their self-knowledge, to develop skills and, above all, to help them to be and feel healthy.

This being said, we propose to:

### **UA Cup**

The most beloved competition of our academy started its 20th edition this season and, with it, an increasing involvement of our community. This competition, born in 2003/2004, currently has more than 3000 participating students and stands out for its multiple modalities, as well as for its longevity. However, we believe that this competition still has a lot to evolve in order to maintain itself as the biggest and best amateur sports competition held internally in the university context.

Therefore, it is important to prioritise:

- Reviewing all the internal regulations of the competition in order to constantly adjust the law to the needs of the competition;
- Directly supporting the structure of AAUAv nuclei, since these are the clubs and the responsible ones for the success of our UA Cup;
- Training our Academy at refereeing level, betting mainly on the student community;
- Computerizing the UA Cup, through a digital platform available to all students that contains the calendar of the games, the live results and the classifications evolving this to the management platform of the competition in which the nuclei submit the registered athletes and the game sheets;

- Dynamising the mascot of our competition "Aristides";
- Making the final phases of the competition more dynamic, enhancing them and the teams therein more and more;
- Uniformizing the image of Aristides Hall Pavilion in accordance with the competition.

## **Well-Being**

The concern with the Well\_Being of our Academy has been a constant concern for the AAUA, and this movement reinforces the concern and ambitious projects for 2023 in order to strengthen our community. Therefore, and with a view to the future and the health of students, it is essential that initiatives in this area are strengthened.

To this end, we intend to:

- Enhance the mental health series through new themes and dynamics directed to students, in order to enable them to manage and deal with their behaviours and emotions;
- Develop the Health and Well-Being programme, as has been done in conjunction with the university, for the whole academic community in order to promote a healthier campus;
- Promote Well-Being inside and outside the university, through the development of activities throughout the mandate covering a wide range of topics, from mental to physical health, such as workshops for the development of skills and acquisition of knowledge, and volunteering actions.

## **CNU's**

At a higher sporting level, the national university championships are a major pillar of the Academy's external representation. In this way, the sector commits itself to accompany and empower its athletes in the most diverse sports, giving them all the conditions to practice their sport and informing them of the benefits of integrating the teams, both in terms of student-athlete status and in the attribution of sporting merit scholarships.

In this way, we have the following objectives:

- Encourage the nuclei to share dates of CNU's and what advantages/benefits the athletes can have by integrating them in the catchment processes;
- To appeal to the participation in tryouts and enhance their exposure;

- To value athletes, through the various moments of communication, as well as specific ceremonies for competitions.
- As for sports in a general overview, despite the great offer that the AAUAv provides to students, it is of utmost importance that they are developed and new dynamics are target of analysis in order to elevate sports in our Academy.

In this sense, we also intend to:

- Support the project under development of the new sports centre so that it is seen as the capital of university sports in Portugal;
- Raise awareness of the reality experienced in adapted sports and valuing the modalities practiced, by holding a tournament with one or more adapted modalities;
- Organize the Inter-polytechnic tournament together with the nuclei representing the four polytechnic schools;
- Hold an Inter-departmental tournament;
- Realization of a 24h tournament for the whole Academy;
- Realization of the UA Without Borders, noting the relevance it has in the integration of our students;
- Stimulating activities in the daytime period of the Enterro'23 week, promoting the Academy's activity;
- Launch of the UAVEIRO Sports Club, as well as its Academy;
- Application to the final stages of the National University Championships in 2024;
- Holding of the European Basketball Championship 2023, unifying the European continent with 500 athletes in Aveiro, in the period from 23 to 30 July;
- Apply for the National University Championships and host city of European and World University Championships;
- Sports Gala highlighting sports in the Academy at an internal and external level.

## **For an Academy of Authenticity**

Culture is unquestionably the most basic and authentic form of freedom. In an Academy constituted by a huge mass of young people who are in constant metamorphosis, culture is denoted as unifying, being the main stimulus for connection between students. In the end, culture is assumed as a "cornerstone" of personal affirmation. And that is why it is so singular and beautiful.

In an Academy like the University of Aveiro, which is vast, disparate and multicultural, it is necessary to broaden culture, making it a reference and a safe harbour for all participants. Therefore, it is necessary to invest in all its aspects, demystifying the various forms of art and showing them to the Academy, thus making Culture an essential element for a daily life rich in experiences and extensive in experiences. For an Academy that is creative, unique and, essentially, authentic.

"Without culture and the relative freedom that it presupposes, society, however perfect it may be, is nothing but a jungle. That is why every Authentic creation is a gift for the future."  
(Albert Camus)

Thus, the Culture sector of the movement "Pela Academia" proposes to:

With regard to a scope of **Community Proximity to Culture and the University Campus**:

- Stimulate a cultural and plural agenda that intends to cover all students of the UA, through the presence of artists of the various musical styles, always seeking the representation of all students of the University of Aveiro;
- To foster the connection with other academies in the country through partnerships, communication and development of events together, affirming and creating opportunities for the expansion of cultural and academic experiences of all students;
- Promote events that represent the UA's International Cultures, providing opportunities for their presentation, as well as for training and dissemination to the whole community;
- Organize CoMA and CoDJ's, involving participants in open events for students, rewarding the winners with the possibility to perform at the Enterro 23', the largest cultural activity held by AAUA that is directly interconnected with students;
- Promote the Cultural dynamization of the UA Campus and Inter-Campus Interaction;

- Promote the access to contemporary political, cultural and artistic discourse, giving continuity to the living room sessions, which are so important to our Academy;
- Organize diverse cultural moments, without date or notice, as a way to surprise students and make the campus more dynamic;
- Organize a cultural month, with the purpose of promoting shows and artistic projects in the Campus and in the city with UA students, with this dynamic being a possibility for students to expose their cultural skills and, basically, a way of promoting their talent;

Regarding the **Casa do Estudante**. Our House. Everyone's House:

- Resume the realization of the Dr. Why Cup competition, betting on appealing prizes to attract more and more students, involving all the existing nuclei in the UA;
- Hold the Open-mic karaoke night and an Open- mic night of poetry recitation. Free activities where participants can enjoy the stage to express themselves;
- Innovate in the concepts and themes of the Bar do Estudante parties, continuously trying to search for appealing themes that capture students through innovation;
- Promote the daytime dynamics of the Student House through cultural and leisure moments promoted by the students, as well as in the evening concept, thus bringing the students closer to the House;

**For the Stage Room:**

- Boost the dynamisation of the Sala Palco, making it a reference, versatile and welcoming space, introducing concerts by emerging and nationally quoted artists of varied styles and areas;
- Holding cooking shows useful for the academic community, as suggestions for practical meals;

**Carrying out the Semana do Enterro 23'**

- Hold the long-awaited Enterro 23', promoting greater musical diversity through interest surveys to the Academy's students;
- Promote daytime activities in the enclosure space, with the increase of amusement machines, providing a richer academic week for students

**Regarding the Cultural Agenda**, it is intended to be comprehensive. Therefore, our intention is to:

- Promote more dynamic concerts with musical diversity in open spaces, in the UA Campus, as for example, in the photosynthesis and half moon;
- Carry out the Open-air Cinema;
- Carry out a Food-fest, having as main goal to make students aware of new cultures through "Food-tasting" of international dishes and snacks;
- In order to value circus arts and humour, create stand-up comedy shows, magic and activities, such as the Got Talent, trying, to appeal to the participation of the students of our Academy;
- Dynamize the giveaway "Os Cinco" with more stimulating activities and a more innovative disclosure, having as main goal to offer culture in its various forms to the academic community and the Aveiro region;

### **Creation of the UA Radio**

The UA radio is a long-awaited project that will certainly come true this year. We intend for the radio to be an intervening space, to demystify concepts, to divulge dynamic activities and, above all, a materialization of what we want our Academy's culture to be;

Stimulating Vital Events for the Academy:

- Carry out the great event of integration to the new students of the Academy: the "Integra-te", which will be a landmark for the Campis. In this edition, the movement "Pela Academia", intends to promote a bigger musical diversity through suggestions given by the students
- Being one of the most loved events in the students' hearts, the "Arraiais" reflect the strength of the Portuguese culture, being one of the great objectives of this new mandate to continue with the realization of "arraiais" for our Academy.

## **For an Academy that understands the importance of Communicating**

We are living in a digital era that denotes, in an impactful and evident way, the importance of adopting effective and efficient communication strategies that allow the institution to get closer to the whole academic community.

Communication assumes, therefore, a central role as an aggregating and connecting element of the whole community, having as its main objective to contribute to the approach and unification of the whole Academy of the University of Aveiro, since it is preponderant in the establishment of a strong and consistent relationship and in the basis of confidence by the Academy.

In this way, the sector of Communication and Image of the movement "Pela Academia" proposes the following objectives:

- Creating a direct communication channel with students in order to promote greater proximity to the Academy, this being a channel that aims to be a form of close communication with the AAUAv, allowing greater support to students;
- To bring AAUAv's communication closer to the city, trying to promote a close relationship with the habitants of the city;
- Continue to carry out a transparent, inclusive, integral, informal and close communication with students in the AAUAv's domain pages;
- Creating a communication strategy for AAUAv services;
- Projecting the European Basketball Championships on an international level and on a national and regional level;
- Redesign the communication of the sectors of the AAUAv Board in order to create a common, strong and impactful communication strategy;
- Continue the promotion and realization of the Mental Health Series in conjunction with the University of Aveiro;
- To promote the creation of a fortnightly chronicle in Diário de Aveiro, narrowing the communication with the existing newspapers in the Aveiro region and at a National level;
- To ensure the transmission of the final stages of the UA Cup;

## **For an Academy that comes closer to the Region**

The Academic Association of the University of Aveiro is by nature an institution that values working in favour of its student and academic community, and the Region in which it is inserted. Since its foundation, the AAUAv has been working towards the proximity between the student community and the region. Throughout time, several initiatives have emerged, always with the main motto in the social area, but also working on culture and sports.

In this sense, and with the motto of continuing to work towards a greater proximity with the region, the movement "Pela Academia" commits itself to:

- Carry out the second edition of the Solidarity Race, to take place on December 1st, in order to create a routine activity that always unites the region in favour of a social cause;
- Continue with the dynamization of fairs in the main campus boulevard, promoting local producers as well as the AAUAv nuclei and students, making the obvious and physical approach Region to Student Community; Also promote a home-made products fair, promoting small businesses and the sale of sustainable products;
- Return to the focus on the study support initiative, giving it for the first time the face-to-face aspect, to be carried out in the "Vol Store";
- Carry out several initiatives that promote rubbish collections, particularly cigarette waste collections, both in the main campus and in Oliveira de Azemeis and Águeda poles;
- Simulate a summit on climate change, in order to make the academic community aware of the problems that surround us. The discussion where the future and current effects of climate change in Aveiro are exposed and solutions which are within the reach of the academic community are debated, becomes more than urgent in the years we live in;
- Promotion of the UA Campi and Aveiro Region to be more sustainable, through various forms of awareness raising, as well as creating partnerships that become relevant to work with. The main focus will always be to improve the environmental responsibility of Aveiro's society, as well as demystifying the concept of sustainability;
- Dynamize, in the "Vol shop", several Workshops promoted essentially by elderly people, for children and young people;

- Promote the UA Community Garden, developing a garden shared by the local community with the main goal of educating the population and encouraging the consumption of local products;
- Carry out several initiatives to collect rubbish on the region's beaches, encouraging the care and conservation of natural spaces while working to bring the student community closer to Aveiro residents;
- Promote the first edition of AAUAv Plogging, an activity that joins environmental awareness to sports once again promoting the union of the Aveiro community and students;
- Promote the first edition of a “Cãominhada”, in collaboration with an animal association from the city of Aveiro, with the purpose of providing a walking activity with animals complementing with a collection of goods for the association;
- To dynamize an electronic bank of volunteering, compiling the different offers of volunteering, both national and international, in order to facilitate the accessibility of information to the academy;
- Constant book/clothing exchange post at the "Vol shop";
- Realization of several screenings to be carried out throughout the mandate where the academic and local community will be given the possibility to participate in several types of screenings, being these for STD's, diabetes, mental health, among others;
- Measurement of AAUAv's annual ecological footprint, in order to have a real notion of the impact of the activity and take measures to revert and reach carbon neutrality;
- Creating business partners that give advantage to the student community;
- Developing and signing a protocol with the university so that we have goals and measures for the Academy to achieve carbon neutrality by 2030;
- Developing various nudging strategies to impact the academic community and the region;

## **For an Academy of Inclusion and Equality**

The Board of the General Assembly is the highest deliberative body of the Academic Association of the University of Aveiro. Composed by five elements elected by student's vote, its task is to convene and conduct the Students' General Assemblies, to give possession to the governing bodies of the Academic Association, to monitor its operation and to ensure the electoral processes within the structure, respecting all the principles of democratic, independent and representative expressed in the statutes by which it is governed.

Therefore, the candidates to the the Board of the General Assembly propose to:

- Comply with and enforce the Statutes of the Academic Association of the University of Aveiro, and its regulations;
- To hold Student's General Assemblies, encouraging the participation of the students and running them in a transparent and impartial way;
- To improve the exposure of the notices of the Students' General Assemblies and make them more appealing;
- Comply and enforce the Electoral Regulations and manage, in a transparent and impartial way, all electoral processes under the responsibility of the Electoral Commission;
- To train and instruct the members of the Boards of the Nuclei of the Academic Association of the University of Aveiro;
- To support, whenever necessary, the social bodies of the Academic Association and the Nuclei.

## **For an Academy of Transparency**

The Supervisory and Judicial Council (CFJ) is the organ belonging to the Academic Association of the University of Aveiro, responsible for the supervision of all the financial and management elements.

Candidates to the CFJ of the movement “Pela Academia” commit themselves to:

- Supervise the correct compliance with the statutes and regulations existing in the AAUAv structure, proposing sanctions when justified;
- Supervise and assist the administration of the AAUAv board and Nuclei coordinations;
- Issuing reasoned opinions on the Activity Plans and Budgets proposed by the AAUAv and Nuclei;
- To issue reasoned opinions on Activity and Account Reports prepared by the AAUAv and Nuclei;
- Initiate reasoned enquiries into the financial or administrative management of any AAUAv organ, autonomous section, nucleus or committee, if deemed justifiable;
- Promote transparency by disclosing to students decisions taken by the organ, when it deems justifiable;

At the level of activities, the candidates to the CFJ show here their intention to continue the training integrated in “FORMA-TE@AAUAv” to support the Nuclei in the elaboration of the “PAOs” and “RACs”. Besides the above, it is also our intention to promote (together with the AAUAv management) financial and management trainings for the Nuclei of the AAUAv structure.

|2022-2023|
